Contents

1	StartScreen	2
1.1	constructor	2
1.2	draw	2
1.3	animateTitle	2
1.4	drawUsernameBox	3

1 StartScreen

Author: Steven Dellamore

Description: StartScreen will render the first screen that people go to when joining the game. It will contain all the buttons to create, join, and view the highscore screen.

1.1 constructor

Author: Steven Dellamore

Description: This function gets called when making a startscreen object. It will init all the values and set up the socket listener for the server to send things too

`constructor()`

Parameters:

int x : This is the xcord of the params

int y : This is the ycord of the params

int z : This is the zcord of the params

1.2 draw

Author: Steven Dellamore

Description: This function will be ran at 60 frames a second and will call all the functions needed to draw the launch screen.

`draw()`

Parameters:

void : Takes no params

1.3 animateTitle

Author: Steven Dellamore

Description: Will check and add/subtract the locations of the T's falling

when you go to the launch screen. Once the animation is done, this function will return instantly.

```
animateTitle()
```

1.4 drawUsernameBox

Author: Steven Dellamore

Description: This function will draw the username bot onto the screen

```
drawUsernameBox()
```
